- Cebuano

PROFILE

I'm Arje Usman, and I've been passionate about web development since I was in grade 10. It was during that time that I discovered PHP, a dynamic and versatile programming language that has been at the core of my technical journey for the past 7 years.

Throughout my experience with PHP, I have gained a deep understanding of its features, frameworks, and best practices. In addition to my proficiency in PHP, I have a strong command of front-end technologies such as HTML, CSS, and JavaScript, allowing me to create seamless and visually appealing interfaces that enhance the overall user experience.

WORK EXPERIENCE

- Programmer\IT Staff  
2022 - PRESENT  
MEDINA COLLEGE  
As a programmer at Medina College Ipil, Inc., my role revolves around designing and developing various systems that cater specifically to the needs of the school.
- Layout Artist  
2021 - 2021  
GALAXY PRINTING  
As a layout artist at Galaxy Printing, I create visually appealing and well-organized designs for various printed materials. I collaborate closely with clients and the production team to deliver exceptional results that leave a lasting impression.
